CONFIDENTIAL

AI Tools Compliance & Transparency Report

A comprehensive overview of GenLy AI's AI tool usage, data protection practices, copyright considerations, and content safety framework.

GENLY AI | APRIL 2026 | V1.0

01 — EXECUTIVE SUMMARY

Compliance at a Glance

100%

AI CALLS LOGGED

Every AI invocation recorded with tool, prompt, and data types

0

PROHIBITED TOOLS

No Midjourney, Sora, Dall-E, Runway, or litigated tools

3 Layers

CONTENT SAFETY

Prompt blocking + AI validation + mandatory human review

Backgrounds Only

AI limited to visual backgrounds

Enterprise API

Google Vertex AI with DPA

No Training

Data never used for model training

Full Provenance

Export-ready for copyright filing

Exclusively Google Vertex AI Enterprise

TOOL	PROVIDER	PURPOSE	AGREEMENT
Google Veo 3.1	Vertex AI Enterprise	Background video generation	ENTERPRISE API
Google Imagen 4	Vertex AI Enterprise	Background image (fallback)	ENTERPRISE API
Gemini 2.5 Flash	Vertex AI Enterprise	Style analysis & YouTube SEO	ENTERPRISE API
OpenAI Whisper	Self-hosted (local)	Audio transcription	NO DATA LEAVES INFRA

Key distinction: All Google AI services are accessed through the **Vertex AI Enterprise API** — Google's enterprise cloud platform with full Terms of Service, Data Processing Amendment (DPA), and contractual data governance commitments. This is not the consumer Google AI Studio product.

Verified: No Prohibited Tools

Full codebase audit confirms zero references to any of the following services:

Midjourney
Not used

OpenAI Sora / DALL-E
Not used

Runway
Not used

Hailuo / Minimax
Not used

Stability AI
Not used

Any litigated tool
Not used

TRADITIONAL (NON-AI) TOOLS USED IN PRODUCTION:

moviepy
Video compositing

FFmpeg
Encoding & format

ImageMagick
Text rendering

Google Fonts
SIL OFL licensed

AI = Backgrounds Only

AI-Generated

Background visuals only — landscapes, abstract scenes, atmospheric effects. No people, faces, characters, or main content. Must be disclaimed for US copyright registration.

Human-Created

Lyrics overlay & timing, typography selection, visual composition, audio-visual synchronization, style choices, original audio. All copyrightable.

WHAT AI DOES NOT DO

- No people / faces / hands generation
- No lip-sync or face-swap
- No likeness regeneration
- No audio generation or modification
- No existing footage extension
- No full scene or character creation

03 — AI USAGE SCOPE (CONTINUED)

Human-Created Background Option

Users can upload their own background assets, bypassing AI generation entirely. This option enables workflows where AI modifies or composes over human-created content rather than generating from scratch.

Upload Custom Background

MP4, MOV, JPG, or PNG. AI background generation is completely skipped. Provenance records the asset as "human-provided".

Full Copyright Retention

When using human-provided backgrounds, the entire visual composition consists of human-created elements — fully copyrightable.

Element-Level Copyright Attribution

ELEMENT	CREATED BY	COPYRIGHT STATUS
Background visuals	AI (Veo 3.1 / Imagen 4)	DISCLAIM FOR USCO
Lyrics text overlay & timing	Human (reviewed + edited)	COPYRIGHTABLE
Typography & font selection	Human	COPYRIGHTABLE
Composition & layout	Human (traditional tools)	COPYRIGHTABLE
Audio-visual synchronization	Human	COPYRIGHTABLE
Audio recording	Human (pre-existing)	COPYRIGHTABLE

Provenance Export: Every video includes a machine-readable provenance report listing all AI and human elements with copyright status, per the US Copyright Office guidance (Feb 2023). Ready for copyright registration filings.

05 — CONTENT SAFETY

Three-Layer Content Protection

1

Prompt Blocking

All generation prompts include explicit exclusion of people, faces, hands, text, logos, and trademarks. Enforced at code level — cannot be overridden by users.

```
"No people, no faces,
no hands, no text,
no words, no letters"
```

2

AI Validation

After generation, video frames are extracted and analyzed by Gemini Vision to detect prohibited content. If violations are found, the job is automatically blocked.

Blocked automatically if people, faces, text, or logos detected

3

Human Review

Every job requires explicit human approval. Downloads and YouTube publication are blocked until a reviewer approves. Identity and timestamp logged.

Approve / Reject with notes

No Training on Client Data

Google Cloud Vertex AI Enterprise does not use customer data to train foundation models. Per Google Cloud's Terms of Service and Data Processing Amendment (DPA), customer data is processed in real-time and not retained beyond the API request lifecycle. GenLy AI does not opt in to any training programs and does not perform fine-tuning on any models.

DATA SENT TO EACH API — MINIMIZED BY DESIGN

API	DATA SENT	NOT SENT
Gemini (Lyrics)	First 600 chars of lyrics, artist name*	Full audio, full lyrics, user PII
Veo 3.1 (Video)	Scene prompt only	Audio, lyrics, artist name
Imagen 4 (Image)	Scene prompt only	Audio, lyrics, artist name
Gemini (YouTube)	Artist, song, 300 chars lyrics	Full audio, user PII
Gemini Vision	Video frames (images only)	Audio, lyrics, artist name

* Artist name is configurable — can be anonymized via platform settings.
Audio files are never sent to any external AI service. Whisper transcription runs locally.

Data Flow Architecture

User MP3 Upload
Audio stays on our infrastructure

↓

Whisper (LOCAL)
Transcription — no data leaves

↓

Gemini (600 chars only)
Lyrics analysis → scene description

↓

Veo 3.1 (prompt only)
No lyrics or artist data sent

↓

moviepy + FFmpeg (LOCAL)
Compositing — traditional tools, no AI

07 — AUTHORIZATION & CLEARANCE

Pre-Authorization + Mandatory Review

User Pre-Authorization

All users must be explicitly authorized by a platform administrator before accessing AI generation features. Unauthorized users receive a 403 Forbidden response. Full audit trail of who authorized whom and when.

Mandatory Human Clearance

Every generated video enters "Pending Review" status. A human reviewer must examine video, short, and thumbnail before approving. Downloads and YouTube publication are blocked until explicit approval. Reviewer identity and notes logged.

WORKFLOW

UPLOAD MP3 → AI GENERATION → CONTENT VALIDATION → PENDING REVIEW → HUMAN APPROVAL → AVAILABLE

Every AI Call Recorded

A dedicated provenance system logs every AI tool invocation with full detail, enabling copyright registration, regulatory compliance, and internal audit.

Per Invocation

Tool name & version, full prompt, prompt hash (SHA-256), response summary, input data types, output artifact path, duration, timestamp

UI Timeline

Visual provenance tab in every job detail view with collapsible prompt details. Accessible to job owner and administrators.

Export

Machine-readable JSON export with AI vs. human element separation, copyright disclaimers, and data protection info. Ready for filing.

```
{
  "job_id": "a1b2c3d4e5f6",
  "ai_generated_elements": [{ "element": "video_bg", "tool": "veo-3.1 (google_vertex)", "copyright_status": "disclaim for USCO" }],
  "human_created_elements": [{ "element": "text_overlay", "copyright_status": "copyrightable" }],
  "copyright_disclaimer": { "ai_elements_to_disclaim": ["video_bg", "lyrics_analysis"], ... },
  "data_protection": { "training_policy": "Vertex AI does not train on customer data", ... }
}
```

09 — SUMMARY

Compliance Summary

- **AI Tools**
  Exclusively Google Vertex AI Enterprise. No prohibited or litigated tools.
- **AI Scope**
  Background elements only. Primary content is human-created and copyrightable.
- **Copyright**
  Full provenance export with AI/human element separation and USCO-compliant disclaimers.
- **Content Safety**
  Triple protection: prompt blocking + automated AI validation + mandatory human review.
- **Data Protection**
  Vertex AI Enterprise — no training on client data. Data minimization active. Audio never sent to AI.
- **Authorization & Clearance**
  Pre-authorization required. Mandatory human approval before any content is downloadable.
- **Provenance & Audit Trail**
  Every AI call logged with tool, prompt, data types, artifacts. Export-ready for compliance filing.

CONFIDENTIAL

Built for Compliance.
Ready for Review.

GenLy AI is designed to meet the highest standards of AI tool governance, copyright transparency, and content safety in the music industry.
